SUBJECT INDEX

Age
  stalagmites 269
  uranium series determination 265
Antarctica, accelerated ice discharge 31–3
Anthropogenic sea-level change 48–51
Aral–Caspian sink 72
  replenishment 74

Bacon Hole, UK
  air photograph 259
  features 258
  foraminiferans 264
  mammalian deposits 263
  platform deposits 260
  transverse sections 261
Beach
  Ocean City, US 145
  response to sea-level rise 139–49

Carbon dioxide, climate sensitivity 35
Caves
  Gower peninsula 246, 247
    appearance 248
  investigations 247
Christchurch Bay, UK
  littoral drift 129
  location 121
Coastal sedimentation
  Eastbourne 208–21
  Holocene, East Sussex 205–40
Coast erosion 134, 135, 140
Combe Haven Valley, UK
  aims and techniques 228
  cross-profiles 233
  forest clearance model 237, 238
  long-profile 230
  map and boreholes 229
  palynology 234–6
  radiocarbon analysis 234
  sediments 231
  sediment type sites 232
  sites, discussion 236
Corsica
  features 104, 105
  high-energy locations 106
  hydrodynamic variation and sea-level 103–16
  southern shoreline 107–16

Data display 298
Dead Sea
  hydrodynamic scheme 75, 76
  raising 75
Dutch, response to sea-level 64

Early detection 35
  future sea-level rise 23–38
  ice sheet extent 37
  ocean winds 37
  sea-ice cover 36
  surface temperature 36
Eastbourne
  biostratigraphic regressive overlap 216
  borehole sites 210
  coastal evolution model 221–6
    stages 222, 223
  cyclic erosion 238, 239
  Langney Point 217
    biostratigraphy 219
    estuarine, evidence 220, 221
    sediment type site 218
  lithostratigraphic units 214
  Lottbridge Drove 211–17
  map 209
  sediment type site 215
  site areas 226
  Willington levels, profiles 212–14
    pollen 216
East Sussex
  coastal sedimentation 205–40
  study areas 207
El Niño ocean signal 16

Falconer, Hugh 251
Flackstrom tidal basin
  development 162
  sedimentation 164
  sedimentation profile 163
  wave attack and current 163
Flandrian evolution 126–31

Geodetic radiointerferometry 5–8
Geodetic techniques 3
German Bight
  geomorphology 153
  map 153
  North Sea encroachment 156
  tidal flats 152, 153
  water level changes 154
Glaciers
  increased warming 34, 35
  surface melting 30, 31
Global Positioning System (GPI) 8
  use 13
Global temperature variation 44, 45
Gower peninsula
  air photograph 248, 249
  interglacial complex 266
  map 247

sea-level change evidence 243–69
Grain-size distribution 107
marine sands 108
marine sediments 111
Quaternary sediments 114, 115
sand matrix 115
Greenhouse effect 24
Northern Hemisphere temperature 49
sea-level 25

Heat, ocean–atmosphere partition 25
Heat transfer, ocean 29, 30
Hurst Castle Spit, UK
appearance and ridges 122
beach 123
cross-section 132
boreholes 127
Flandrian evolution 126–31, 135
diagram 128
future evolution 133–5
mean high-water movement 132
overwashing 129
recent evolution 131
Shingles Bank growth 130
stability and sea-level 130
Hydrodynamic variations and sea-level, Corsica 103–16
Hydrological cycle management 65
Hyposometric curves 165

Ice, global quantity 52
Ice sheets, increased warming 34, 35
Ice stream
Antarctica 32
discharge rates 32, 33
Ireland
coastal environments 81, 82
relative sea-level 83
sea-level history 82–4
sea-level and sediment 79
Irrigation 68
Isobase contours 300, 301
Northwestern European Geoid 300–7
Israel, map 62

Jersey
data synthesis 198
Grouville marsh data 184–9
palaeoenvironmental data 188
plant macrofossils 186, 187
stratigraphy 185
Holocene Coastal Environmental Changes 199
Holocene sea-level changes 177–203
Le Marais de Saint Pierre data 189–95
marine incursion 194
palaeoenvironmental data 191
plant microfossils 192, 193
stratigraphy 190
Le Port data 179–84
palaeoenvironment 181
local correlation 201, 202
location and map 179
New Street, St Helier data 195–8
palaeoenvironmental data 196
regional correlations 202, 203
Jerusalem underground 74–6

Mammalian deposits 257, 263
Management, sea-levels 277–84
active 281, 282
passive 282, 283
Microfossil data 184, 185
Minchin Hole 248
air photograph 252
deposit section 254
entrance 252
exploration 249
mammalian specimens 256–58
Patella Beach 254, 255
section 253
Model
natural climate 41
natural sea-level change 46–8
Modelling, sea-level change 41–56
Morphosedimentary facies 97

New Generation Water Level Measurement System, scheme 10
North Sea
mean high water 158
water level variations 156

Ocean bottom studies 245, 246
Ocean City, US
beach features 143
beach response to sea-level 139–49
sea-level rise scenario 145
shoreface changes 144
shoreline changes 141, 279
historical 142
projected 146, 147
shoreline retreat, projected 147
Oxygen isotopes 43

Palaeoenvironmental data, Jersey 181, 188, 191
Palynology 234–6
Peat formation 182
autochthonous 200
Pleistocene high energy environments 113
Population 54
Project NOAH 61–76

Quaternary coastal sediments
age and sea-level 105, 106
Corsica 108–10

Radiocarbon dating and sea-level indicators 287–308
data base 288, 289

elevation and time 297
isobase contours 300–7
isobase maps 287, 293
list of European 310–22
North–South section 289–95
Northwestern Europe curve 293
sample map 296
sample numbers 310–22
Ravenscliff Cave and hippopotami 267, 268
Research, sea-level
applications 275–7
literature 274
theoretical development 276
Reservoirs
global capacity 66
sea-level 68, 69
water accumulation 67

Sand, scanning electron microscopy 183
Sandstones, stratified marine, Corsica 112
Satellite, future sea-level use 23–38
Sea-level
absolute data, applications 17, 18
gauge number 17
absolute network design 11–17
changes
future 51, 52
historical 50
modern 63, 64
climate phenomena 12
climatic warming 27, 28
cycle periods 43, 44
delayed warming 34
eustatic rise estimates 29
future rise 23–38
gauge sites 4
global reference system 3
heating effect on ocean 28
land motion data 18
management and consequences 73, 74
measurement of absolute 1–20
accuracy 8–11
present network 3
model comparison 46–8
natural change 45
past trends 26, 27
signals 11
total rise anticipated 33, 34
volume suppression 68
Sediment
barrier development 88–94
bedform arrangements 90
coastal changes 79–99
dispersal, glacial cliffs 84–8
dispersal model 87
erosion spectra 87, 88
longshore transfers 89, 91
movement, wave modification 91, 92
offshore banks 85
platform dispersal 94
elements 96
wave effects 95
ramp deposits 96
and sea-level 80, 97
wave/platform interactions 92–4
Sedimentation, tidal flat area 151
Senegal River 172
Shoreline developments 279
threat 280
Silt grain, scanning electron micrograph 197
Solent, UK
buried channel profile 128
coastline 110
crest heights 125
sea-level changes 124
shingle ridges 125
Stratigraphy, West African Holocene 167–73
Studies, sea-level, information base 277

Three Cliffs Bay, UK appearance 250
Tidal exceedence curve 92
Tidal flats
dyking effects 159
hypsometric curves 155, 165
sedimentation 160
sedimentation and water-level 161
water level elevation 157, 159

Universal gravitational constant 54

Venice
Bora wind effect 341, 342
city and industry 335
engineering projects 334
engineering and sea-level 323–45
fish ponds 322, 323
flooding 339, 340
flooding levels 323
ground level raising 335, 336
harbour traffic 345
highest tide levels 328
lagoon division 338
lagoon map 325
man-induced changes 331–4
mean sea-level changes 329
mobile lagoon gates 337
pedestrians 339
sea-level changes 326
subsidence 330
tidal flats 332
Very Long Baseline Interferometry (VLBI) 12
accuracy 8, 9
application 5
GPS combined 13–15
installations 7
sites 6

Water level elevation and tidal range 151–66
Water mass, volume balance 71
Water sinks, global 71
Water storage sites 70
Wave/platform interactions 92–4

Wave power 275
West African Stratigraphy
historical setting 168, 169
holocene climate 169–71
holocene deposits 172
relationships 171
